

Customized Electric Fish Vending Autokiosk

KSCADC has distributed 28 custom-made electric Auto Fish Vending Kiosks to selected fisherwomen groups from the fishing villages of Nayarambalam and Chellanam in Ernakulam district, and Chalilgopalpetta in Kannur district. This initiative empowers fisherwomen to become active participants in the fisheries value chain by equipping them with modern tools, resources, and the skills required to operate the kiosks efficiently. Hands-on training sessions were provided to all beneficiaries to ensure smooth operation and management of the units. The project aims to enhance livelihood security, promote sustainable fish vending practices, and strengthen the socio-economic status of fisherwomen across coastal communities. KSCADC also proposes to distribute additional auto vending kiosks in other selected fishing villages as part of its ongoing livelihood enhancement programmes.
