

## FISHERIES TRAINING CENTRES

The establishment of **Fisheries Stations, Fisheries Training Centres, and Matsyabhavans** plays a pivotal role in strengthening the fisheries sector by providing comprehensive support and capacity-building opportunities to fishermen and other stakeholders. These institutions act as vital hubs for disseminating knowledge, offering technical guidance, and facilitating access to various government schemes and welfare programmes.

Fisheries Stations serve as regional support centres equipped to handle field-level activities such as resource monitoring, data collection, and implementation of fisheries development initiatives. Fisheries Training Centres focus on skill enhancement and education, imparting practical training on modern fishing techniques, sustainable aquaculture practices, value addition, and fish processing. Meanwhile, Matsyabhavans function as one-stop service centres for fishermen, offering assistance in licensing, welfare schemes, financial aid, and dissemination of scientific and technological advancements.

Together, these institutions form the backbone of an integrated fisheries support network, empowering fishermen through knowledge, technology, and institutional backing — thereby ensuring sustainable livelihood development and holistic growth of the fisheries sector.

### ▪ Fisheries Stations

| SI No | Project                          | Year of Sanction | Outlay (Rs. in lakh) |
|-------|----------------------------------|------------------|----------------------|
|       | <b>Alappuzha</b>                 |                  |                      |
| 1     | Fisheries Station at Thottapally | 2013-14          | 50.00                |
|       | <b>Thrissur</b>                  |                  |                      |
