

Net Mending Yard/Thanal Shed

A Net Mending Yard serves as a vital facility for the repair and maintenance of fishing nets, especially during adverse weather conditions when fishing activities are halted. These yards provide a safe, covered, and organized space for fishermen to mend, dry, and store their nets, ensuring that their fishing gear remains in good condition and ready for use once the sea becomes calm. Recognizing the hardships faced by fishermen in carrying out such activities in open areas exposed to sun, wind, and rain, the Government, through timely and proactive intervention, has established net mending yards in strategically identified coastal stretches. These facilities not only safeguard the livelihood assets of fishermen but also enhance their operational efficiency, promote safety, and contribute to the overall welfare of the fishing community.

SI No	Project	Year of Sanction	Outlay (Rs. in lakh)
	Trivandrum		
1	Thanal shed at Vettoor North	2011-12	6.00
